

STORMforce

Fire Fighting Trailers

- Low profile tank design
- High flexibility
- Fully roadworthy chassis
- High quality non-chip thermoplastic coating
- Low maintenance

TPMT-1000
1,000 litre tank pump & monitor trailer

The Angus Fire STORMforce range of fire fighting trailers provides powerful fire fighting performance for a wide range of applications from emergency pumping duties to bulk storage tank protection. They are ideal for providing fast flexible emergency response around a large site or cluster of smaller sites in a locality, with diverse equipment options.

STORMforce fire fighting trailers set new standards of flexibility and performance for high risk environments. They have been created using state-of-the-art solid modelling computer software to offer faster delivery and greater flexibility to meet specific requirements.

Based on 3 chassis designs STORMforce trailers provide a rapid and cost-effective response to your fire fighting needs.

MFT
Monitor
Flatbed Trailer

BIT-1000 - 1,000 litre base injection trailer

TMT-2000 - 2,000 litre tank & monitor trailer

The STORMforce range features many advantages:

- Low profile tank design provides low centre of gravity for enhanced operational stability
- High flexibility to meet specific customer requirements
- Fully roadworthy chassis designed for rapid deployment
- Independent suspension for improved handling
- Over-run braking system, hand brake and road lighting as standard
- Stabiliser jacks for added safety during operation
- High quality non-chip thermoplastic coating bonded onto metal
- Compatible with the Titan range of monitors
- Very low maintenance requirements
- Towing hitch options available

STORMforce TANK TRAILERS

- 4" Storz inlet and efficient pipework minimises pressure loss
- Safety and stability enhanced by low profile design
- Efficient tank design facilitates easier monitor operation
- Non-slip decking for increased operator safety
- Optional 4 way collecting head available to utilise 2 1/2" fire hoses

TMT-1000

1,000 litre Tank & Monitor Trailer

The 2 wheeled TMT-1000 tank trailer is capable of taking any Angus Fire foam concentrate to suit your flammable liquid hazards. It provides optimum fire fighting performance when fitted with Titan monitors.

TMT-2000

2,000 litre Tank & Monitor Trailer

This 4 wheeled TMT-2000 trailer is designed for larger flammable liquid hazards. Larger flows, up to 3,600 l/min can be accommodated using Titan monitors and self-inducing foam cannons or fog/jet nozzles.

BIT-1000

1,000 litre Base Injection Trailer

The BIT-1000 trailer is highly effective when filled with FP70 Plus or Alcosel for base injection applications on hydrocarbon storage tanks. It can be fitted with two High Back Pressure Generators, two portable inductors ready plumbed for fast and trouble-free operation and up to 16 lengths of Duraline layflat fire hose.

STORMforce

Fire Fighting Trailers

TPMT-1000 1000 Litre Tank Pump & Monitor Trailer

Offers a flexible approach to mobile fire fighting. Suction and delivery hoses can be used to connect the pump and monitor via the 4" trailer inlet with the option of foam being induced from the low profile 1,000 litre capacity tank. Alternatively water may be used as a first attack reservoir to provide 2 minutes water supply for a 500 litre/minute pump and nozzle combination.

- Accommodates LWA500, LWA900, LWA1200 and LW2250 portable fire pumps or a foam transfer pump
- Range of Titan monitors available
- Non slip decking for increased operator safety

EQUIPMENT TRAILERS

- Wide range of equipment options
- Minimised pressure losses from efficient pipework
- Non-slip decking for increased operator safety
- 4" Storz inlet as standard
- Other coupling systems available

MFT Monitor Flatbed Trailer

Compact, lightweight flatbed trailer suitable for rapid deployment of Angus Fire Titan monitor.

PMXT-270 - 270 litre premix trailer

PT Pump Trailer

Capable of accommodating any Angus Fire portable fire pump in the range (500 to 2,250 l/min) with 4 lengths suction hose, 4 lengths Duraline fire hoses and ancillary equipment in the tool box provided. To minimise manual handling and provide faster operation, all Angus Fire pumps can be operated directly from this STORMforce trailer.

- Optional wheeled pump transporter
- "Mini fire-engine" capability
- Optional tough moulded protective pump cover

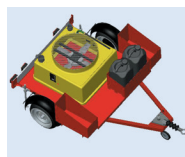

PMXT-270 270 Litre Remix Trailer

Ideally suited to sites where there is no fire water hydrant system. Offers self-contained rapid response for flammable liquid fire fighting. Powered by a nitrogen cylinder, it comes complete with 25m x 45mm fire hose fitted with instantaneous couplings and fully adjustable water jet/spray nozzle.

- Self-contained, ready for action
- Suitable for water, fire fighting foam or wetting agent usage
- Range of tank sizes available

PT - pump trailer

TBXT - turbex trailer

TBXT Turbex Trailer

An ideal and convenient way of transporting everything needed for generating High Expansion Foam on a compact trailer platform. Stowage is provided for the Angus Turbex MkII High Expansion Foam Generator, foam making net and smoke extraction ducting, 4 x Duraline fire hoses plus 2 x 25 litre drums of Expandol foam concentrate.

- Extra Expandol foam drums available as optional extra
- Optional small portable pump to provide pressurised water supply. Additional data sheets are available for material specification and dimensional information.

Other STORMforce Trailer Options (available to special order):

- Transportable trailers to carry a range of equipment
 - 1,000 litre IBCs, 20, 25 or 200 litre foam drums
 - portable or wheeled extinguishers
 - breathing apparatus cylinders
 - fire hoses
 - mobile foam units etc.
- Dual agent dry powder and foam units
- Mini-fire engines
- Foam proportioning systems
- Larger 100mm waterway monitors
- Wide range of fire pump sets
- Alternative towing hitches
- Separate specifications for all ancillary equipment
- Details available on www.angusfire.co.uk
